

NuSpa

Design nature

TECHNICAL INFORMATION - SIGMA Series

Formed from one of Nature's most sustainable and renewable resources, a free-standing bathtub, washbasins and stool give new identity to cork, a new relationship with beautiful and practical results.

Produced by machining a solid block of agglomerated cork with a seven-axis robotic sculptor capable of intricate and large forms, NuSpa breaks new ground.

Using the properties of cork, the innovative objects bring advantages to the bathroom; naturally insulating to maintain water temperature, more comfortable, safer in impact and above all sustainable, NuSpa bathroom furniture is unique, exclusive and entirely unexpected.

Design: Alzira Peixoto & Carlos Mendonça

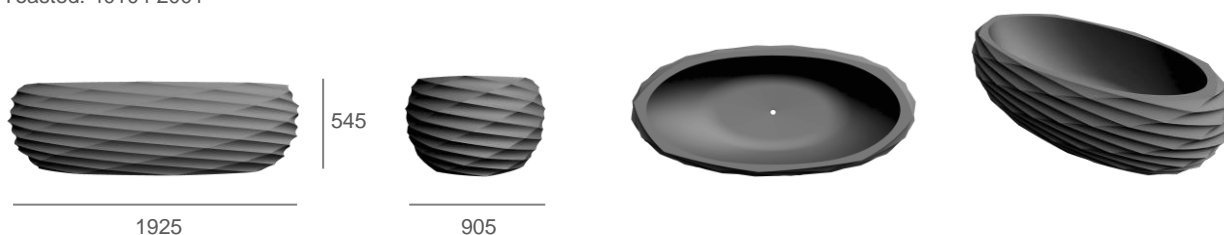

FREESTANDING BATHTUB SIGMA

Features:

Made of solid agglomerated cork;
Warm and comfortable;
Naturally insulating, keeping water temperature and saving energy;
Safer in case of falls;
Central drain;

Material / Finish

Natural cork
CORKGUARD® SPA

Toasted cork

Accessories

Pop-Up drain without overflow

General Features

Made of solid agglomerated cork;
Odourless;
Water resistant;
Safe handling;
High fire resistance, without the release of toxic gases;
Contains more than 80% of cork (post-industrial recycled content);
Natural, biodegradable and recyclable product, made using raw materials from sustainable sources;
Contains no PVC and no softeners or other substances hazardous to health or the environment.
Tests made (on similar agglomerated cork) show the compliance for the contents of heavy metals, organostannic compounds, preservatives, formaldehyde and microbiological control.

GRANORTE reserves the right to make changes to material and structure to improve the quality or technical performance.
